README

Note: This application seems to work best in Internet Explorer. Disqus seems to affect posts when displayed on Firefox.

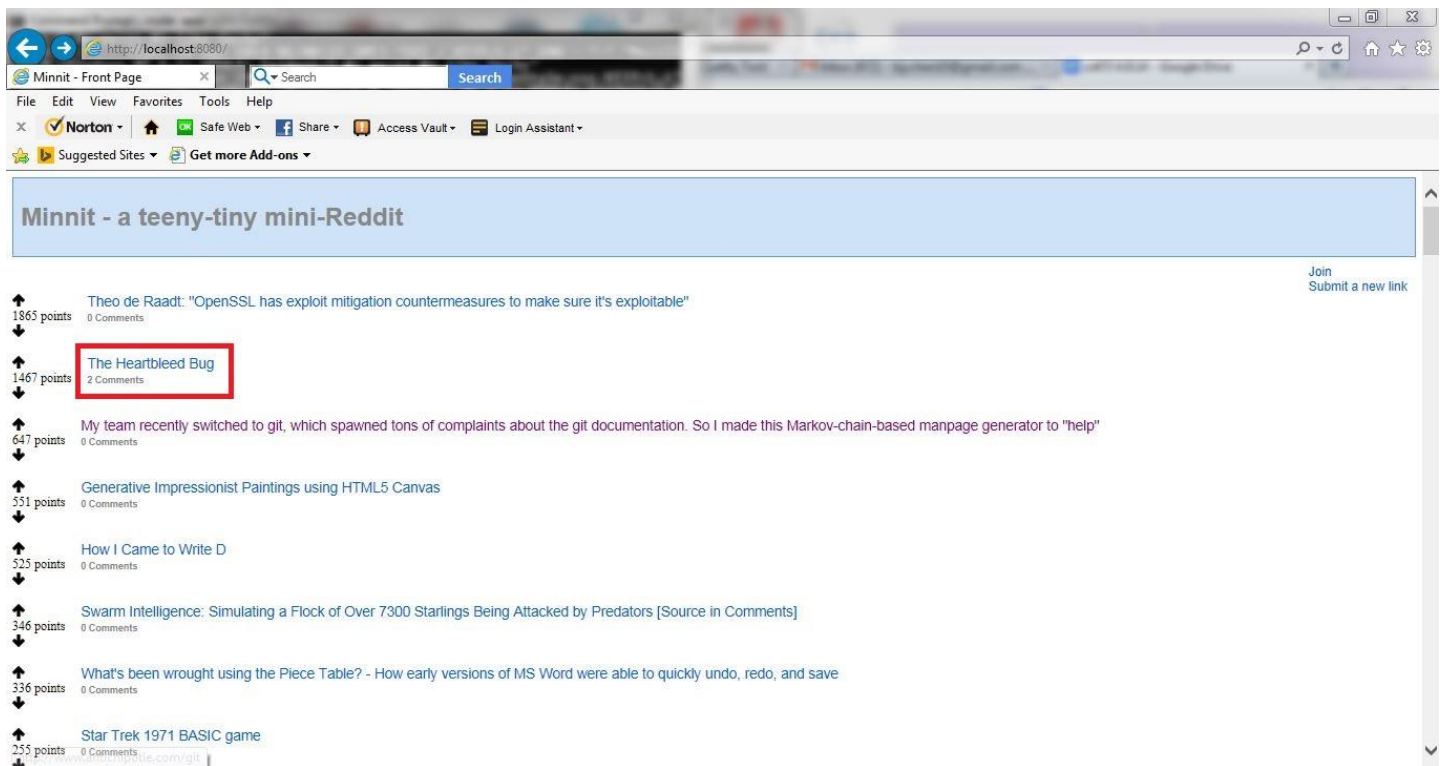

Front Page:

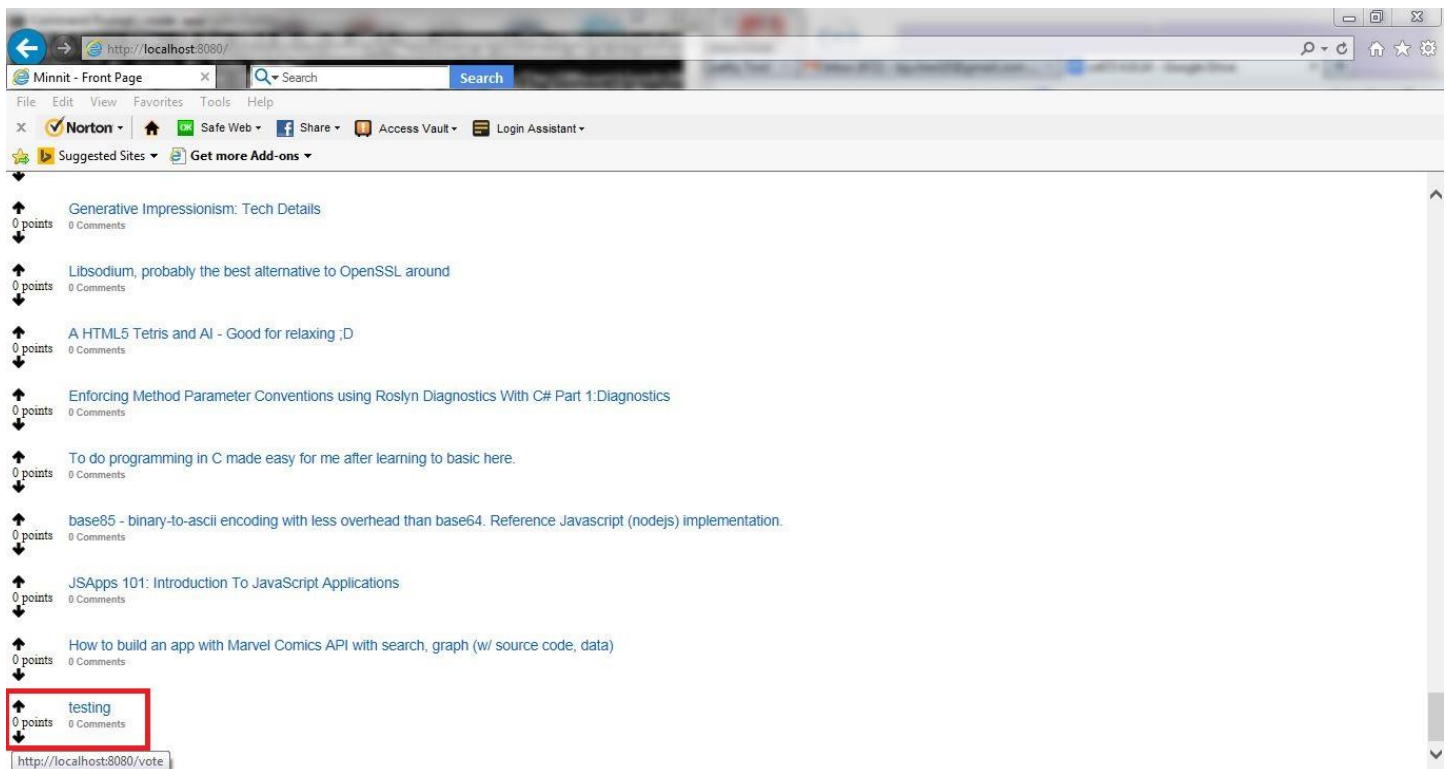

Creating two comments on “The Heartbleed Bug” comments page:

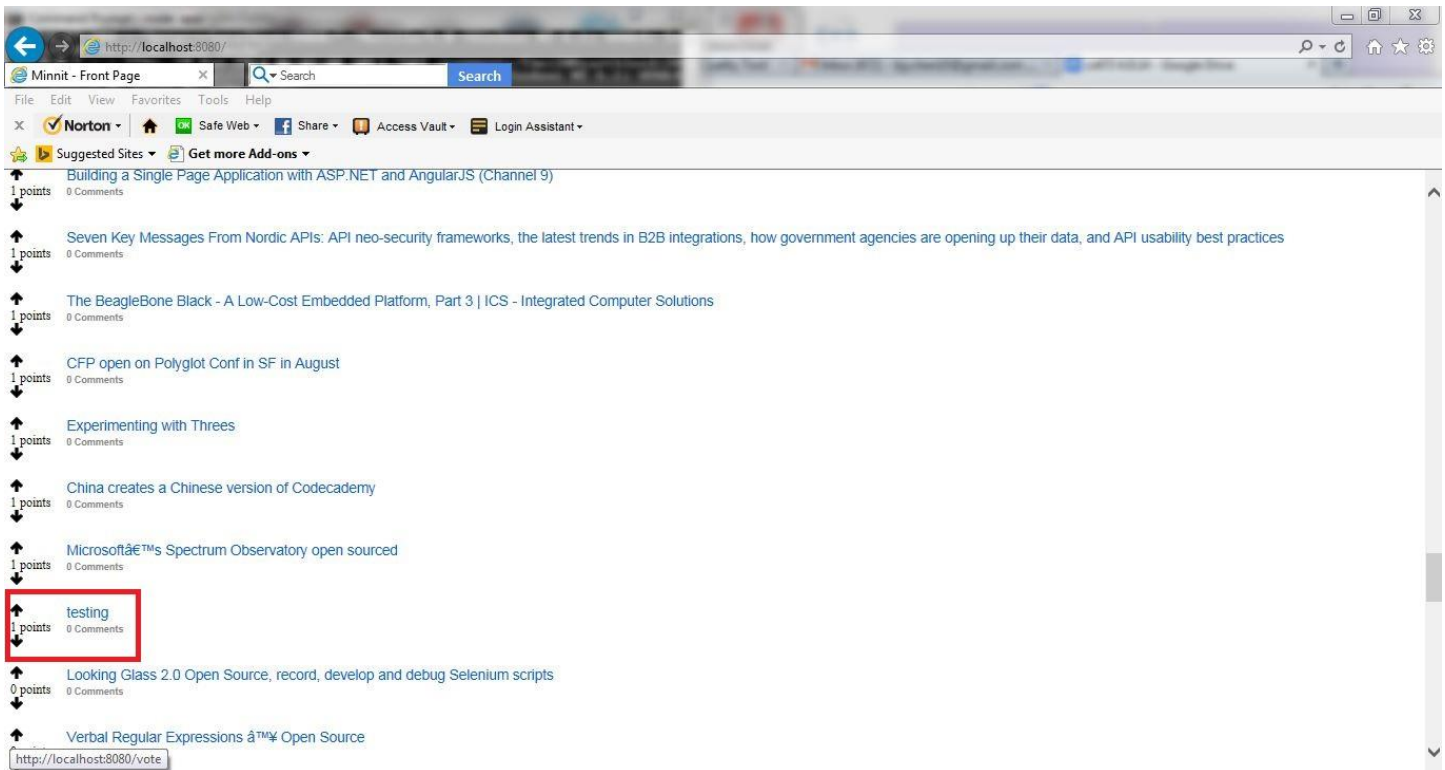

Front page displaying the two comments:

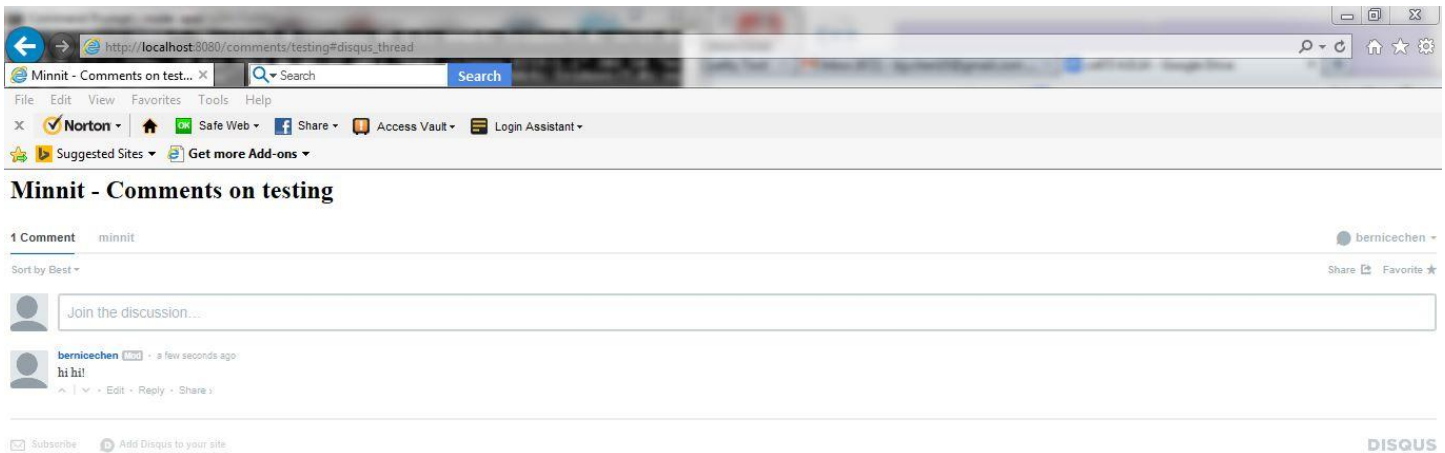

Created "testing" post:

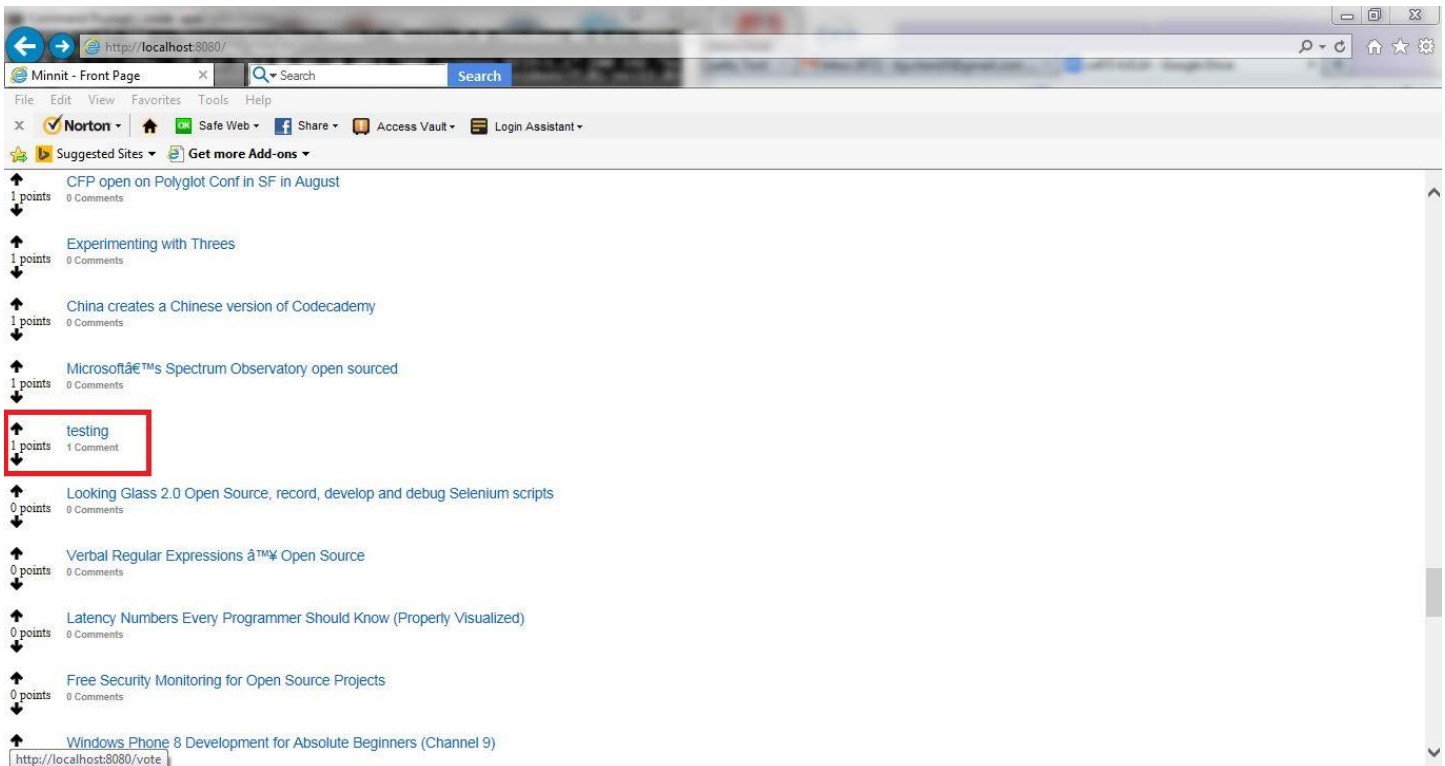

Increment ranking by 1:

Added a comment to “testing” post:

“Testing” post now displays “1 Comment”:

The signup and submit page now looks like this with the applied css:

A screenshot of the 'Minnit - Signup' page in a Mozilla Firefox browser. The address bar shows 'localhost:8080/signup'. The page has a light blue header with the title 'Register for Minnit'. Below the header, there are two input fields: 'Username:' with the value 'bernice' and 'Password:' with masked characters. A 'Sign Up' button is located at the bottom of the form. The browser's toolbar shows the 'File', 'Edit', 'View', 'History', 'Bookmarks', 'Tools', and 'Help' menus, along with a search bar and various add-ons.A screenshot of the 'Minnit - Submit' page in a Mozilla Firefox browser. The address bar shows 'localhost:8080/submit'. The page has a light blue header with the title 'Submit a new link'. Below the header, there are two input fields: 'Title:' and 'Link:'. A 'Submit Link' button is located at the bottom of the form. The browser's toolbar shows the 'File', 'Edit', 'View', 'History', 'Bookmarks', 'Tools', and 'Help' menus, along with a search bar and various add-ons.
